

Cengage Learning

During the COVID-19 pandemic, Cengage is supporting the higher education community by offering to faculties free access to Cengage digital solutions across South Africa until the end of June 2020. This includes:

- MindTap with 1,300 titles spanning a wide range of disciplines
- SAM for Microsoft Office skills
- WebAssign for disciplines in Maths, Physics and Engineering
- OWLv2 for Chemistry
- CengageNOW for courses in Business and Management, Finance, Accounting, Decision Sciences, and Psychology

The digital solutions can be integrated into LMS for simplified access and keeping course content in one place. They contain tools and materials, such as eBooks, multimedia resources, practice questions, assessment materials and revision aids. If instructors need to track their students' progress whilst teaching remotely, they have access to analytics and gradebook features to check on student engagement and scores. And, in response to instructor needs during this health crisis, a virtual classroom app called Bongo in MindTap will allow instructors to host live, interactive class sessions with students.

More information, help and support resources are being added to [Cengage's customer support page](#) including dates and times about their peer-to-peer webinars and pre-recorded webinars on virtual teaching strategies.

For more information on free access and support available in South Africa please contact your Cengage Learning Consultant by emailing heide.kallis@cengage.com.
